

## **Dopis na Mayo Clinic**

**Mayo Clinic in Rochester, Minn.**

**Dear Sirs,**

**our Expert Group "Research Organization", a branch of the Czech Physical Society, Section of the Union of Czech Mathematicians and Physicists (in Czech "Odborná skupina Organizace Vyzkumu Ceske fyzikalni spolecnosti Jednoty ceskych matematiku a fyziku") knows about the recent visit of Professor Virend Somers in Czech Republic. (With the best reminiscences I remember meeting Professor Somers in April 2007 in Brno at the occasion of his being bestowed Dr. h. c. of the Masaryk university and being also one of the most distinguished participants of the conference I had initiated - in cooperation with my colleagues - as the honorary consultant of Dr. Tomas Kara, then the executive director of the ICRC.)**

**We are very interested to know the official opinion of Mayo Clinic concerning the actual situation in the ICRC, especially whether there is a danger that the collaboration of Mayo in the ICRC Project would eventually not continue because of some reason.**

**We would be grateful very much, indeed, to you for any reaction.**

**With best wishes and admirable respect to Mayo,**

**Yours sincerely,**

**Prof. Dr. Martin Cernohorsky**

**emer. Professor of Physics**

**Expert Group "Research Organization" Chair (Czech Physical Society, Union of Czech Mathematicians and Physicists)**
